

Process of Object detection model

- 1- We collected many coins for this model
- 2-Ahmed Gamal, Abdelrahman Dief took many photos for theses coins in several difference places then he uploaded them on drive
- 3-Mariam Mahmoud renamed all photos to be easily and obvious for other team members to work on them
- 4-Yousef Khaled started to label this data set
- 5-Sama Abdou trained our model on our data set then send output file for us, she used google collaboration
- 5-Ahmed Frag tried his testcases on our model
- 6-We checked output graphs then tried to solve it with more required dataset
